Research on metaphor has been dominated by Aristotelian questions of processes in metaphor understanding. Although this area is important, it leaves unasked Platonic questions of how structures of the mind affect such processes. Moreover, there has been relatively little work on how metaphors affect human behavior. Although there are numerous

postdictive or speculative accounts of the power of metaphors to affect human behavior in particular areas, such as clinical or political arenas, empirical verification of these accounts has been sparse. To fill this void, the editors have compiled this work dedicated to empirical examination of how metaphors affect human behavior and understanding. The book is divided into four sections: metaphor and pragmatics, clinical uses of metaphor, metaphor and politics, and other

applications of metaphor. Chapters contained within these sections attempt to merge Aristotelian questions with Platonic ones.

Using Figurative

Language presents results from a multidisciplinary decades-long study of figurative language that addresses the question, 'Why don't people just say what they mean?' This research empirically investigates goals

speakers or writers have when speaking (writing) figuratively, and concomitantly, meaning effects wrought by figurative language usage. These 'pragmatic effects' arise from many kinds of figurative language including metaphors (e.g. 'This computer is a dinosaur'), verbal irony (e.g. 'Nice place you got here'), idioms (e.g. 'Bite the bullet'), proverbs (e.g. 'Don't put all your eggs in one basket') and others. Reviewed studies explore mechanisms - linguistic,

psychological, social and others - underlying pragmatic effects, some traced to basic processes embedded in human sensory, perceptual, embodied, cognitive, social and schematic functioning. The book should interest readers, researchers and scholars in fields beyond psychology, linguistics and philosophy that share interests in figurative language - including language studies, communication, literary criticism, neuroscience, semiotics, rhetoric and

anthropology.

L2 Figurative Language Teaching Scholastic Inc. Based upon historical and archival research, as well as the author's years of fieldwork in indigenous communities, Michael Uzendoski's theoretically informed work analyzes value from the

perspective of the Napo Runa people of the Amazonian Ecuador. Written in a clear and readable style, *The Napo Runa of Amazonian Ecuador* presents theoretical issues of value, poetics, and kinship as linked to the author's intersubjective experiences in Napo Runa culture. Drawing on insights from the theory of gift and value, Uzendoski argues that Napo Runa culture personifies value by transforming things into people through a process

of subordinating them to human relationships. While many traditional exchange models treat the production of things as inconsequential, the Napo Runa understand production to involve a relationship with natural beings (plants, animals, spirits of the forest), which are considered to be subjects that share spiritual substance, or samai. Throughout the book, value is revealed as the outcome of a complicated poetics of transformation by which things and persons are

woven into kinship forms that define daily social and ritual life.

Language Therapy for Children With Hearing Loss: A Practical Auditory-Based Guide is a well-organized and practical textbook based on a proven spoken language, speech, and listening model for teaching children with hearing loss. Supported by decades of research and experience, the stage-based model is presented with clear steps for intervention. Written in easy-to-understand language, this textbook is accessible to university students who are new to the field of hearing loss,

as well as to new and experienced professionals. It is a highly applicable tool for providing auditory-based therapy which supports professionals to empower parents and caregivers. The stages emphasized in this textbook are developmental in nature, starting with the prelinguistic level and ending with advanced communication. Unlike the traditional age approach, this unique system can address any child regardless of age intervention. Operating

based on the understanding that language is acquired through meaningful social interaction, the “stages not ages” system can be used for late starters, English learners, and children with additional disabilities. Key Features:
 * A color-coding system for the model and a consistent presentation of content and tables provide clarity and a streamlined experience * A comprehensive case study for each stage puts the approach into context
 * Easy-to-use resources,

learning activities, and discussion questions may not be included as published in the original print version of this book.

Comprehension is the key to reading success! Reading for Every Child: Comprehension encourages fourth-grade students to be stronger readers using a wide range of reading comprehension activities. Reading selections from across the disciplines encourages students to understand, evaluate, and interpret what they read. This 80-page book includes projects, worksheets, games, and graphic organizers. It

supports Reading First and aligns with Common Core State Standards. Common Core for the Not-So-Common Learner, Grades K-5 Walter de Gruyter GmbH & Co KG Metaphor theory, observes John Bird, is like Mark Twain: both seem simple upon first introduction. Now, in the most complete study to date of Twain's use of figurative language, a veteran Twain scholar tackles the core of his writing and explores it with theoretical approaches that have

rarely been applied to Twain, providing new insights into how he imagined his world--and the singular ways in which he expressed himself. From "The Jumping Frog" to the late dream narratives, Bird considers Twain's metaphoric construction over his complete career and especially sheds new light on his central texts: *Roughing It*; *The Adventures of Tom Sawyer*; *Adventures of Huckleberry Finn*; *A Connecticut Yankee in King Arthur's Court*;

Pudd'nhead Wilson; and *No. 44, The Mysterious Stranger*. He reconsiders "Old Times on the Mississippi" as the most purely metaphorical of Twain's writings, goes on to look at how Twain used metaphor and talked about it in a variety of works and genres, and even argues that Clemens's pseudonym is not so much an alter ego as a metaphorized self. By offering insight into how Twain handled figurative language during the composing process, Bird reveals not only hidden

facets of his artistry but also new aspects of works that we think we know well--including some entirely new ideas regarding Huck Finn that draw on the recent discovery of the first half of the manuscript. In addition to dealing with issues currently central to Twain studies, such as race and gender, he also links metaphor to humor and dream theory to further illuminate topics central to his work. More than a study of Twain's language, the book delves

into the psychological aspects of metaphor to reveal the writer's attitudes and thoughts, showing how using metaphor as a guide to Twain reveals much about his composition process. Applying the insights of metaphor theorists such as Roman Jakobson and Colin M. Turbayne, Bird offers readers not only new insights into Twain but also an introduction to this interdisciplinary field. In lively prose, *Mark Twain and Metaphor* provides a

vital way to read Twain's entire corpus, allowing readers to better appreciate his style, humor, and obsession with dreams. It opens new ground and makes old ground fresh again, offering ways to see and resee this essential American writer. *Funny in Farsi* University of Illinois Press
