From the author of The Best Laid Plans comes another fresh voiced, hilarious rom-com perfect for fans of You Have a Match and The Rest of the Story. Penny Harris just ruined her life. As one of the most popular girls in school, she's used to being invited to every party, is dating the Jordan Parker, and can't wait to rule senior year with her best friend, Olivia. But when Penny wakes up on Jordan's lawn the morning after his first-day-of-summer bash, she knows something went horribly wrong the night before. She kissed Kai Tanaka. Kai, her longtime nemesis. Kai, Olivia's boyfriend. Penny can't figure out what could have inspired her to do it--she loves Jordan and she would never hurt Olivia--but one thing's for sure: freshly dumped, and out a best friend, the idyllic summer she pictured is over. And despite the fact that Jordan seems to be seeking comfort (and a whole lot more) in Olivia, all Penny can think about is winning him back. Kai wants to save his relationship too, so they come up with a plan: convince their friends that they really do have feelings for each other. After all, everyone forgives a good love story, and maybe seeing Penny and Kai together will make Jordan and Olivia change their minds. But as summer heats up, so does Penny and Kai's "relationship," and Penny starts to question whether she's truly faking it with Kai, if he's really as terrible as she always thought he was, and if the life she's fighting so hard to get back is the one she really wants.

During the last two decades we have seen a tremendous development within the computer and communication industry. The ever increasing density on silicon, the increasing transmission speeds

on fiber based systems as well as twisted pairs, the revolutionary development in the wireless area and of course the Internet have all led to many opportunities for new service developments. It is interesting to note that the last time this conference was held three years ago, the Web really did not fully exist. We are now ready to face new interesting challenges. It is an utmost importance for the performance community to focus on the modeling and analysis of the Internet, the multimedia applications and the untethered applications that are coming to the forefront. There will be a need for new and better simulation methods, new analytical tools and a much better understanding of measurement techniques. "Performance of Information and Communication Systems", PICS'98, which takes place in Lund, Sweden, May 25-28, 1998, is the seventh conference in a series on performance of communication systems organized by IFIP TC 6, WG 6.3. In response to our call for papers, we have received nearly fifty submissions.

Sometimes radical yet always applicable, Brick by Brick abounds with real-world lessons for unleashing breakthrough innovation in your organization, using LEGO--which experienced one of the most remarkable business transformations in recent history--as a business model. As LEGO failed to keep pace with the revolutionary changes in kids' lives and began sliding into irrelevance, the company's leaders implemented some of the business world's most widely espoused

prescriptions for boosting innovation. Ironically, these changes pushed the iconic toymaker to the brink of bankruptcy, showing that what works in theory can fail spectacularly in the brutally competitive global economy. It took a new LEGO management team--faced with the growing rage for electronic toys, few barriers to entry, and ultra-demanding consumers (ten-year old boys)--to reinvent the innovation rule book and transform LEGO into one of the world's most profitable, fastest-growing companies. Along the way, Brick by Brick reveals how LEGO: - Became truly customer-driven by co-creating with kids as well as its passionate adult fans - Looked beyond products and learned to leverage a full-spectrum approach to innovation - Opened its innovation process by using both the "wisdom of crowds" and the expertise of elite cliques - Discovered uncontested, "blue ocean" markets, even as it thrived in brutally competitive red oceans - Gave its world-class design teams enough space to create and direction to deliver built a culture where profitable innovation flourishes Whether you're a senior executive looking to make your company grow, an entrepreneur building a startup from scratch, or a fan who wants to instill some of that LEGO magic in your career, you'll learn how to build your own innovation advantage, brick by brick.

Ever wonder what really goes on among our four-legged friends after we leave the room? In Animal Antics, the secret is finally out. The animals are having a ball-and reading this book, you will too. Cats ride scooters, ducks dance the cancan, beagles lounge at the spa, and, yes, dogs do play poker! Behind this shocking expose is veteran photographer (and digital-manipulation wizard) John Lund. Lund uses amazing digital sleight of hand to endow a menagerie of animals with eerily and uncannily human qualities. The text of the book is equally playful with tasty morsels of advice like "Learn to pamper your soul," "Sharpen your survival skills," and "Chill out as needed." Many of the images in Animal Antics have been featured in a best-selling greeting card line of the same name.
