 "Understanding dynamic complexity is the central scientific problem of our time. We need to look at science itself as an object of study, a historically developed way of producing knowledge that creates a rich mix of insights and confusions. Our approach needs to be partisan, rejecting the notion that feeling is the enemy of reason or that a commitment to human well-being is an enemy of objectivity. Richard Levins, an ex-tropical farmer turned Harvard University ecologist, biomathematician and philosopher of science, gives us his first book since the hugely influential *The Dialectical Biologist*. He argues for a good, combative, perceptive scientific method that is more reflective of the complex, dynamic world in which we live and more supportive of precautionary decisions. *Talking About Trees* ranges widely, from personal narratives to theoretical discussions on the need for the precautionary principle in science. Levins offers a strong critique of the industrial-commercial pathway to development; in its place he promotes an alternative development pathway that emphasizes economic viability with equity, ecological and social sustainability and empowerment of the dispossessed."

The extraordinary, groundbreaking novel from Laurie Halse Anderson, with more than 2.5 million copies sold! The first ten lies they tell you in high school. "Speak up for yourself--we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless, outcast, because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. As

time passes, she becomes increasingly isolated and practically stops talking altogether. Only her art class offers any solace, and it is through her work on an art project that she is finally able to face what really happened at that terrible party: she was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. Her healing process has just begun when she has another violent encounter with him. But this time Melinda fights back, refuses to be silent, and thereby achieves a measure of vindication. In Laurie Halse Anderson's powerful novel, an utterly believable heroine with a bitterly ironic voice delivers a blow to the hypocritical world of high school. She speaks for many a disenfranchised teenager while demonstrating the importance of speaking up for oneself. *Speak* was a 1999 National Book Award Finalist for Young People's Literature.

An accessible and compelling story of a scientist's discovery of plant communication and how it influenced her research and changed her life. In this "phytobiography"--a collection of stories written in partnership with a plant--research scientist Monica Gagliano reveals the dynamic role plants play in genuine first-hand accounts from her research into plant communication and cognition. By transcending the view of plants as the objects of scientific materialism, Gagliano encourages us to rethink plants as people--beings with subjectivity, consciousness, and volition, and hence having the capacity for their own perspectives and voices. The book draws on up-close-and-personal encounters with the plants themselves, as well as plant shamans, indigenous elders, and mystics from around the world and integrates these experiences with an incredible research journey and the groundbreaking scientific discoveries that emerged from it. Gagliano has published numerous peer-reviewed scientific papers on how plants have a Pavlov-like response to stimuli and can learn, remember, and communicate to neighboring plants. She has pioneered the brand-new research field of plant bioacoustics, for the first time experimentally demonstrating that plants emit their own 'voices' and, moreover, detect and respond to the sounds of their environments. By demonstrating experimentally that learning is not the exclusive province of animals, Gagliano has re-ignited the discourse on plant subjectivity and ethical and

legal standing. This is the story of how she made those discoveries and how the plants helped her along the way.

Readers of exciting, challenging and visionary literary fiction—including admirers of Norman Rush's *Mating*, Ann Patchett's *State of Wonder*, Barbara Kingsolver's *The Poisonwood Bible*, and Peter Matthiessen's *At Play in the Fields of the Lord*—will be drawn to this astonishingly gripping and accomplished first novel. A decade in the writing, this is an anthropological adventure story that combines the visceral allure of a thriller with a profound and tragic vision of what happens when cultures collide. It is a book that instantly catapults Hanya Yanagihara into the company of young novelists who really, really matter. In 1950, a young doctor called Norton Perina signs on with the anthropologist Paul Tallent for an expedition to the remote Micronesian island of Ivu'ivu in search of a rumored lost tribe. They succeed, finding not only that tribe but also a group of forest dwellers they dub "The Dreamers," who turn out to be fantastically long-lived but progressively more senile. Perina suspects the source of their longevity is a hard-to-find turtle; unable to resist the possibility of eternal life, he kills one and smuggles some meat back to the States. He scientifically proves his thesis, earning worldwide fame and the Nobel Prize, but he soon discovers that its miraculous property comes at a terrible price. As things quickly spiral out of his control, his own demons take hold, with devastating personal consequences.

Over the years, a little sapling has grown into a big birch tree, standing right next to a family's house. It has a sturdy trunk and branches full of leaves. For the birch, the year is full of changes: the warmth of summer; the wistful farewells of autumn; the chill of winter; and the miracle of growth in spring. The birch is often the center of life for the children playing in the yard, but sometimes the birch is left all alone. In this book, each month depicts a vignette in the life of the birch and its surroundings. The tree and the family are in an ongoing, delicate interaction—from one day, one month, and one year, to another.

Can You Hear the Trees Talking? Farrar, Straus and Giroux (BYR) NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; her TED talks have been viewed by more than 10 million people worldwide. In this, her first book, now available in paperback, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths—that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes—in inspiring, illuminating, and accessible ways—how trees, living side by side for hundreds of years, have evolved, how they learn and adapt their behaviors, recognize neighbors, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies—and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. And Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them. And as she writes of her scientific quest, she writes of her own journey, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world.

A boy keeps finding himself in trouble until a wise tree teaches him to ask, "What if I do this? What could happen?" A friendly old mulberry tree teaches this brother and sister to pause and think before they use hurtful words, make dangerous choices, or are just plain inconsiderate. "If you'll hurt yourself, hurt someone else, or make your momma mad... you should probably change your action." With a few chuckles and some heartfelt moments, children learn to consider the consequences and adjust their actions before they get themselves into trouble. "What if?" includes lessons in treating others with respect, taking responsibility, and building self-control. Free online worksheets, printables, and lessons plans at <http://TalkingTreeBooks.com> make this a great resource for teachers and parents who want to teach children to think before they act. Written for children grades K-4, the Talking with Trees book series features supersize pictures that engage children emotionally, helping them learn how to use their hearts and minds to guide them toward building good character traits. The included discussion guide helps parents and teachers expand on the story to talk about children's own experiences building good character.

The New York Times-bestselling story of kindness, friendship, and hope. Trees can't tell jokes, but they can certainly tell stories. . . . Red is an oak tree who is many rings old. Red is the neighborhood "wishtree"—people write their wishes on pieces of cloth and tie them to Red's branches. Along with a crow named Bongo and other animals who seek refuge in Red's hollows, this wishtree watches over the neighborhood. You might say Red has seen it all. Until a new family moves in. Not everyone is welcoming, and Red's experience as a wishtree is more important than ever. Funny, deep, warm, and nuanced, this is Katherine Applegate at her very best—writing from the heart, and from a completely unexpected point of view. This book has Common Core connections.

To Speak for the Trees Penguin

Winner of the Pulitzer Prize in Fiction Shortlisted for the Man Booker Prize New York Times Bestseller A New York Times Notable Book and a Washington Post, Time, Oprah Magazine, Newsweek, Chicago Tribune, and Kirkus Reviews Best Book of 2018 "The best novel ever written about trees, and really just one

of the best novels, period." —Ann Patchett *The Overstory*, winner of the 2019 Pulitzer Prize in Fiction, is a sweeping, impassioned work of activism and resistance that is also a stunning evocation of—and paean to—the natural world. From the roots to the crown and back to the seeds, Richard Powers's twelfth novel unfolds in concentric rings of interlocking fables that range from antebellum New York to the late twentieth-century Timber Wars of the Pacific Northwest and beyond. There is a world alongside ours—vast, slow, interconnected, resourceful, magnificently inventive, and almost invisible to us. This is the story of a handful of people who learn how to see that world and who are drawn up into its unfolding catastrophe.

FROM THE AUTHOR OF THE NEW YORK TIMES BESTSELLER, *THE HIDDEN LIFE OF TREES* A powerful return to the forest, where trees have heartbeats and roots are like brains that extend underground. Where the color green calms us, and the forest sharpens our senses. In *The Heartbeat of Trees*, renowned forester Peter Wohlleben draws on new scientific discoveries to show how humans are deeply connected to the natural world. In an era of cell phone addiction, climate change, and urban life, many of us fear we've lost our connection to nature—but Peter Wohlleben is convinced that age-old ties linking humans to the forest remain alive and intact. Drawing on science and cutting-edge research, *The Heartbeat of Trees* reveals the profound interactions humans can have with nature, exploring: the

language of the forest the consciousness of plants and the eroding boundary between flora and fauna. A perfect book to take with you into the woods, *The Heartbeat of Trees* shares how to see, feel, smell, hear, and even taste the forest. Peter Wohlleben, renowned for his ability to write about trees in an engaging and moving way, reveals a wondrous cosmos where humans are a part of nature, and where conservation and environmental activism is not just about saving trees—it's about saving ourselves, too. Praise for *The Heartbeat of Trees* "As human beings, we're desperate to feel that we're not alone in the universe. And yet we are surrounded by an ongoing conversation that we can sense if, as Peter Wohlleben so movingly prescribes, we listen to the heartbeat of all life." —Richard Louv, author of *Our Wild Calling* and *Last Child in the Woods* "Astonishment after astonishment—that is the great gift of *The Heartbeat of Trees*. It is both a celebration of the wonders of trees, and a howl of outrage at how recklessly we profane them." —Kathleen Dean Moore, author of *Earth's Wild Music* "As Peter Wohlleben reminds us in *The Heartbeat of Trees*, trees are the vocabulary of nature as forests are the brainbank of a living planet. This was the codex of the ancient world, and it must be the fine focus of our future." —Dr. Diana Beresford-Kroeger, author of *To Speak for the Trees* and *The Global Forest* "Peter Wohlleben knows the battle that lies before us: forging a closer relationship with nature before we destroy it. In *The Heartbeat of Trees* he takes us deep into the global forest to show us how." —Jim Robbins, author of *The Man Who Planted Trees*

Finding the Mother Tree Wickwick

A warm, engaging story about honesty and growing from mistakes. A boy sneaks off to play his game player when mom told him not to. He figures that as long as he doesn’t get caught, he’s not lying, right? A wise old tree steps in to help the boy learn that truly being honest is about more than just not speaking lies. If you have to sneak around because you know something is wrong, that’s a kind of dishonesty too, and it doesn’t feel good on the inside. "A conscience is that voice in your head and feeling in your heart that tells you if something is right or wrong, even when no one is looking." With heartwarming wisdom, the tree shows the boy how to make honest choices and to grow from his mistakes. And the book teaches children to listen to their conscience so they can feel the true reward of making good

choices—that feeling of pride for having done the right thing, even when it’s hard. Find free printable posters, worksheets, and lesson plans at <https://TalkingTreeBooks.com>. The Giving Tree Penguin

"All trees have a story. Holly Worton has spent the last few years talking to trees - the birches, the oaks, the beeches and the sycamores. You're probably wondering: How is it that trees can talk? Is this for real? Trees are living, breathing organisms which humans are able to connect and talk to on a deeper level through silent, telepathic communication. Talking to the trees can bring us back to our true selves and can reflect back to us the things we need to see in ourselves. It can also be a space for deep healing. Living in the technology age, however, we spend our lives connected to computers, mobile phones, and video games. Consequently, we've become increasingly disconnected from

ourselves and from Nature. This book is meant to gently encourage you to get back to Nature and turn to the magic and the wisdom of the trees. By reconnecting to Nature, you can improve your relationship with yourself, which will help you make better, more aligned choices in your life. Throughout this book, you'll follow the author, Holly Worton on a journey of connecting on a deeper level with the wisdom of the trees. You'll hear their stories, and you'll be given a series of experiments to carry out, should you choose to do so. These will help you to connect with yourself through connecting with Nature, and they'll open you up to the deep wisdom and healing that the trees can offer. The trees will help you to get out of your head and into your body, so you can feel more deeply and truly experience all the JOY that life has to offer. They'll add a new level of richness to your life that you have never thought possible."--Publisher.
