This text brings together the work of 15 elementary education experts who support an integrative approach to educating second language children. The paperback edition is a collection of articles from fourteen elementary education experts who espouse an integrative approach to second language education - one that goes beyond language teaching methodology - to cover a wide range of issues affecting the academic and social

success of language minority children. The volume deals not only with second language development, but with the development of the whole child. Rather than focusing on language instruction, it addresses the entire curriculum, and instead of restricting itself to classroom learning, it examines the role of the school, family, and community.

Fans of Kate DiCamillo and Linda Urban will love *The Thing About Georgie*, a warm and humorous story starring an unforgettable young boy with dwarfism, from acclaimed author Lisa Graff. As far as Georgie is concerned, everyone has a "thing." The thing about poodles is that Georgie Bishop hates to walk them. The thing about Jeanie the Meanie is that she would rather write on her shoe than help Georgie with their Abraham Lincoln project. The thing about Andy's nonna is that she kisses Georgie's cheeks and doesn't speak one word of English. The thing about Georgie's mom is that she's having a baby—a baby who will probably be taller than Georgie very, very soon. The thing about Georgie . . . well, what is the thing about Georgie?

A perennial bestseller by eminent mathematician G. Polya, *How to Solve It* will show anyone in any field how to think straight. In lucid and appealing prose, Polya reveals how the mathematical method of demonstrating a proof or finding an unknown can be of help in attacking any problem that can be "reasoned" out—from building a bridge to winning a game of anagrams. Generations of readers have relished Polya's deft—indeed, brilliant—instructions on stripping away irrelevancies and going straight to the heart of the problem.

This book is based on two basic assumptions. Firstly, dialogue, conversation, reflection and challenge are fundamental aspects of effective learning and developing personal understanding. Secondly school leaders do not have sufficient time to engage in these activities - they are always the first casualties. Designed to provide stimulus materials for school leaders to support their personal development, *Leadership Dialogues* encourages personal reflection, dialogue with a coach or mentor and conversations in leadership teams. It includes short think pieces, case studies, diagnostic reviews, selected quotations on a particular theme and questions for discussion and reflection.

This book from Scott B. Noegel offers a comparative, in-depth study of "wordplay" in ancient Near Eastern texts. Noegel establishes comprehensive taxonomies for the many kinds of devices that scholars label as wordplay and for their proposed functions. The consistent terminology proposed offers students and scholars of Sumerian, Akkadian, Egyptian, Ugaritic, Hebrew, and Aramaic a useful template for

documenting and understanding the devices they discover and for comparing them across languages for a rich interdisciplinary dialogue.

The Sounds of Early Cinema is devoted exclusively to a little-known, yet absolutely crucial phenomenon: the ubiquitous presence of sound in early cinema. "Silent cinema" may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910).
